

AUTO EQUIPMENT BUILT ON PERFORMANCE

Driving Innovation Since 1954

Seventy years ago, in 1954, brothers Erminio and Remo Corghi founded Corghi Elettromeccanica in Correggio (RE), Italy.

In the 1960s, Corghi revolutionised the industry with the invention of the Artiglio — the world's first rim-clamp tyre changer — setting a new standard in tyre service technology.

Today, Corghi remains at the forefront of innovation and is recognised globally as a leader in automotive repair equipment.

CORGI ARTIGLIO SPACE SAVER TYRE CHANGER

Artiglio Space Saver R is an advanced automatic tyre changer designed for workshops & mobile services where space is at a premium.

Featuring a side-swing post with a pedal controlled pneumatic rotation, this innovative design reduces the machine's operating footprint by almost 1mtr.

Despite its compact size, the Space Saver R delivers exceptional capability.

The Artiglio Space Saver R is a robust, reliable and proven solution for any business needing top-tier performance in the smallest possible footprint.

Pneumatic bead depressor included
