Multiple Jaw Mounting Positions Allow For Multiple Clamping Ranges

Rim clamping range from
outside 10"- 22"
inside 12"- 24"

By adjustable jaws.

This provides a huge range
without the need for an
oversized turntable

Contact phone numbers
for aftersales service

Quality rubber
inflation hose

Adjustable anti
wear roller
Extra strong double
folded tapered post

FEATURES

- The Automaster AM-203IT **Pro Series** Heavy duty tyre changer is our most popular in the Automaster line up.
- It is the perfect changer for busy workshops or tyre shops.
- Engineered for professionals who demand reliability, strength, and high performance — all at an exceptional price."
- Heavy duty pneumatically controlled tilt-back column
- Supplied standard with a **pedal controlled inflation gauge** and **tubeless air blaster system**
- Options of a **1 speed 1Ph motor** or **3ph-2 speed** motor.
- Pedal controlled tyre inflation
- **Tubeless air blast** inflation system with air accumulation tank. Pedal controlled. Each jaw clamp has an angled jet outlet for the tubeless air blaster system.
- **Powerful bead breaker** is designed to break even the most stubborn and rusted beads without damage.
- Reinforced Chassis and column
- Pneumatic locking mechanism automatically gives vertical and horizontal clearance from the rim to avoid scratches on the face of the wheel - an essential feature when dealing with alloy wheels.
- **Optional** HP2 low profile helper arms, or twin helper arms to make changing difficult tyres easy, and help reduce the risk of damage caused by tyre levers.
- **Optional** ATV or M/C adapters

Automaster Tyre machines deliver years of dependability
because they are built using only the highest quality components

Supplied with jaw clamp covers,
top & bottom head inserts, tyre lever, lube brush & 1ltr White
Panther Grease
